the successful evaluation of capital projects requires not only a thorough understanding of traditional techniques of capital budgeting but advanced techniques as well Riahi Belkaoui examines the multidimensionality of capital budgeting in its various facets and in ways that executives with no special facility in the subject can follow he covers replacement decisions capital rationing capital budgeting under inflation uncertainty capital budgeting in a multinational setting with attention to political risks social project evaluation and concepts of wealth measurement and distribution the result is a wide-ranging treatment for executive decision makers in finance banking investment and

general management and for their colleagues with similar interests in the academic community. Riahi Belkaoui begins by examining the principles underlying the time value of money. In chapter two he introduces capital budgeting and in chapter three moves to advanced capital budgeting. There he discusses such advanced topics as replacement decisions, capital rationing, and capital budgeting under uncertainty and inflation. In chapter four he takes up the same issues associated with capital budgeting but in a global context and in chapter five the determination of political risk and its use in capital budgeting internationally. Chapter six compares the techniques of leasing versus purchasing and their reliance on capital budgeting techniques. In chapter seven he turns to the techniques of capital budgeting applied to social projects and ends the book with an examination of the behavior and cognitive implications of wealth measurement and distribution. This is a useful survey and examination of the traditional and advanced techniques of capital budgeting and their applications in domestic and international contexts.

This richly illustrated collection profiles the bold innovators in landscape architecture who around the turn of the twentieth century ventured into the nation's heartland to develop a new style of design celebrating the native midwestern landscape. The pioneers of landscape architecture in the midwest are responsible for creating some of the most recognizable parks, cemeteries, recreation areas, and other public gathering places in the region. Midwestern landscape architecture includes essays on Adolph Strauch, who introduced a new concept of visually integrated landscape treatment in Cincinnati's Spring Grove Cemetery; William Le Baron Jenney, designer of Chicago's diverse West Parks; and Jens Jensen, who created the American Garden in Union Park in Chicago, a celebration of native flora and founder of the Clearing, a unique school of the arts and humanities in Wisconsin. Other major figures include Frederick Law Olmsted Sr., co-designer of New York's Central Park, whose work in the midwest included the layout of the 1893 World's Columbian Exposition; and Ossian Cole Simonds, who helped reconcile the formal approach of the City Beautiful movement with the naturalism of the Prairie School in urban park design. This volume also details the contributions of crusaders for ecological awareness and an appreciation of the region's natural heritage. These include horticultural writer Wilhelm Miller, who spread the ideals of the prairie style; and Genevieve Gillette, a landscape architect and conservationist whose preservation efforts led to the establishment of numerous Michigan state parks and wilderness areas. Midwestern

landscape architecture fosters a better understanding of how landscape design took shape in the midwest and how the land itself inspired new solutions to enhance its understated beauty despite Olmsted's assessment of the Illinois prairie as one of the most tiresome landscapes that I ever met with the midwest has amassed an important legacy of landscape design that continues to influence how people interact with their environment in the heartland
